

Driver Protection System

Driver Protection Systems

The key advantage in terms of safety for public transport drivers.

The new Driver Protection System was developed especially to meet the needs of local public transport. Hygiene and robbery protection are central focal points.

The TÜV-certified system can be quickly and easily retrofitted for permanent use in numerous local public transport bus series.

The benefits

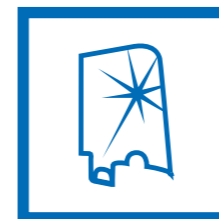

Individual customisation

Easy cleaning

Fast retrofitting

Single-pane safety glass and laminated safety glass

Assembly service on site

TÜV-certified

Driver Protection System

Product details

- The protective dividers of the Driver Protection System boast a modern design and high quality workmanship.
- The version with single-pane safety glass - alternatively as laminated safety glass - provides a lasting contribution to driver safety and is low maintenance.
- Maximum avoidance of visual impairment for the driver with optional anti-reflection coating. Anti-reflection coating on one side: Reduction to 4% reflection and double-sided anti-reflection coating to less than 1% reflection.
- Individual perforations and cut-outs for communication, ticket control and payment process.

Us ...
